RE: SY-00-151\New Products Review\ConShield Technologies,  
Inc.\CONmicSHIELD\_Letter to Vendor\_060710(F).docx

Dear Mr. Shook

The New Products Committee of the Department of Public Works has completed review of your request for approval of CONmicSHIELD. Based on the Committee's recommendation, CONmicSHIELD has been approved by the Deputy Directors. According to the Final Report of CONmicSHIELD all City of Indianapolis requirements for concrete pipe and manholes are still met or exceeded with the additive CONmicSHIELD. CONmicSHIELD may be specified as an alternate as DPW deems best on a case by case basis.

A copy of the Final Report prepared by IUPUI New Product Review (NPR) Team is attached. DPW Staff will contact you on any projects determined best to add CONmicSHIELD as an alternative on a project. If your contact information changes, please feel free to email myself, John Morgan, or Bill Grout with the changes.

If you have any question, please feel free to contact me at 317-327-8704 or by email at [bbowman@indygov.org](mailto:bbowman@indygov.org).

Sincerely,

A handwritten signature in blue ink that reads "William V. Bowman".

William V. Bowman, Chair NPC  
Senior Project Manager

Cc: Steve Nielsen, Deputy Director      Bill Grout, Administrator  
John Morgan, Assistant Administrator
